Strong Points

01

The gas capacity for one bottle is very big (900g) comparing other products. With one bottle, 25,000 shots can be possible in 4ms case. Also, it can be refilled within limited numbers

02

Optimized automatic temperature controlling system. Temperature of water can be adjusted automatically.

03

Spot sizes can be divided very narrowly. It can make user be very convenient for treatment.

04

Auto calibrating system will be equipped.

05

Easier replacement for water and filter with one-touch system.

Features

Laser beam is transferred through fiber to the wanted area precisely without energy loss. So, it is very convenient to use and the treatment time can be quite shorten. Cyro Air Cooling system is installed. So, it can treat patients without pain and also, downtime can be sharply shorten.
